# INTRODUCTION

---

- SafeLambo is a Binance smart chain Ecosystem-based meme token, built to establish a bridge between meme tokens, Dex projects, launchpads, and especially with its community. Primarily focused on partnership between other reputable BSC Projects.
- SafeLambo is a meme token with purpose, we are focused on creating generational wealth for our community (Holders).

We are a team of professional blockchain developers.

- SafeLambo aims to grow as a positive and transparent community and protect capital for investors in an unforgiving DeFi market saturated with inappropriate information, market manipulation, and outright malignant actors. We aim to be resilient in historically volatile times for cryptocurrency and decentralized finance and hope that through being a part of our community, investors can continue to grow, learn, and benefit as crypto-asset adoption becomes more widespread.

# COMMUNITY

---

- The crypto space is in trouble. What happens within the coming years may very well dictate the entire future of meme-coins and other small projects altogether. With this in mind, the SafeLambo team established these key principles in evaluating its own philosophy to development, and benefit for its community. These values will be the cornerstone in constructing the ecosystem, which we believe are of growing importance in this space. By creating a common-sense approach and foundation to the marketplace which continuously aims to provide innovation, we can play a part in saving what the community as a whole has enjoyed so much about this space.

- SafeLambo is built to empower the community, that is, every holder are assumed to be equal irrespective of the quantity held.

The SafeLambo ecosystem empowers individual investors (holders) rather than one single person and therefore operates as a completely decentralized bureaucracy.

## BACKGROUND

---

- We are an independent community founded for service to our holder's community. We are born by the determination to dominate the Market.
- The SafeLambo team comprises individuals with no previous collaboration in the crypto space. We are a fresh team of developers, designers, moderators, administrators, marketers, and shillers.

# VALUES

---

- 1. Transparency
  - 2. Safety
  - 3. Innovation
  - 4. Community
-

# TOKENOMICS

---

- Contract Address: 0xaCa90D1A9E809D2Fc1a6733c5D8615Ad0C0A443B
- Token Name: SAFELAMBO V2
- Token Symbol: SFL V2
- Total Supply: 1,000,000,000,000
- Automated Functions: 8% total tax on buy/sell transaction.  
4% Burn + 4% Charity & Marketing.

# ROADMAP

---

## Q2 2022

- Launch
- Pancakeswap Listing
- Coinmarketcap listing
- Coingecko Listings
- Marketing Campaign

## Q3 2022

- Dexlab listing
- Airdrop
- 1000 Holders
- 1st Burn token
- Marketing campaign

## Q4 2022

- Release SafeLambo NFT
- Release Swap AMM
- Release Decentralize Exchange
- Partnership
- 2nd Burn token

## Q1 2023

- \$SFL NFT Marketplace
- Influencer Awareness
- Partnerships
- Giveaways
- Holders offering
- 3rd Burn token
